Technical Data Sheet

Chainsaw Oil

Chainsaw Oil

Engine Oils

Description

Revolution Chainsaw oil has been specially developed from quality base oils using an adhesive agent to ensure that it is anti-fling.

Application

Revolution Chainsaw Oil is recommended for the lubrication of chains of all types of chainsaw. The adhesive agent enables the chain to stay in place in high pressure environments such as vibration, excessive G-forces, and physical removal by saw dust. The sprockets, link pins and rollers are also lubricated to protect against premature failure.

Benefits

- Excellent adhesion and anti-fling
- Lubricates and protects all parts of the chain linkage and drive
- Prolonged working life
- Reduces effects of high pressure working conditions

Typical Inspection Data

Kinematic Viscosity @ 40° (cSt)	150
Texture	stringy
Flash Point Degrees Centigrade	240
Density @ 15 Degrees Centigrade	886
